CLAY RANGE

Clay is a soil/rock material composed of one or more clay minerals and can contain some quartz, metal oxides and organic matter. Clay is one of the most ancient materials used by men. They are very useful for various applications such as building materials or paper making as well as for the cosmetic industry in mask mostly. Greenphyt offers you a range of 3 clays for this purpose.

Palygorskite PhytPowder is a fine powder obtained from accurate grinding and sieving of Attapulgitic clay.

Ghassoul PhytPowder is a powder obtained from accurate grinding and sieving of ghassoul clay.

Pink clay Aquitaine PhytPowder is a fine powder obtained from accurate grinding and sieving of aquitaine pink clay.

Dead Sea Mud PhytPowder is a powder obtained from accurate grinding and sieving of dead sea mud.

Green Clay Phytpowder is a powder obtained from accurate grinding and sieving of green clay.

CLAY RANGE

	INCI	Geographical Origin	Properties	Characteristics
<i>PALYGORSKITE PHYTPOWDER</i> 	ATTAPULGITE	India	- Mattifying agent, viscosity agent - Absorbent thanks to its sorptive, rheological and catalytic Properties - It binds to acids and toxic substances in the stomach and digestive tract	<u>Packaging</u> : 20 kg <u>DLU</u> : 36 months <u>Granulometry</u> : < 200 µm : > 95% <u>Loss on drying</u> : < 15%
<i>GHASSOUL PHYTPOWDER</i> 	MOROCCAN LAVA CLAY	Morocco	- Traditionally mixed with water before applying on the skin - Higher ratio of silica, minerals, than other clays - skin absorbing, antimicrobial and skin protecting	<u>Packaging</u> : 20 kg <u>DLU</u> : 36 months <u>Granulometry</u> : < 300 µm : > 90% <u>Loss on drying</u> : < 15%
<i>PINK CLAY AQUITAINE PHYTPOWDER</i> 	CLAY	France	- Helps removing blackheads and tightening pores for a smoother skin, antiseptic, regenerating, redness decreasing, healthy glow effect and complexion clearing - Naturally Pink, no use of Pigments - Belongs to the kaolinitic clay family	<u>Packaging</u> : 20 kg <u>DLU</u> : 36 months <u>Granulometry</u> : < 300 µm : > 90% <u>Loss on drying</u> : < 15%

CLAY RANGE

	INCI	Geographical Origin	Properties	Characteristics
<i>DEAD SEA MUD</i> 	DEAD SEA MUD	Jordania	- Fight against skin problems like Psoriasis, Acne. - Moisturizing and rejuvenating but also toning, purifying and softening properties thanks to its rich mineral content. - Once rehydrated, it forms a real exfoliant marine mud with purifying and detoxifying virtues, which can be used as a poultice or mud bath.	<u>Packaging</u> : 20 kg <u>DLU</u> : 36 months <u>Granulometry</u> : < 200 µm : > 90% <u>Loss on drying</u> : < 15%
<i>GREEN CLAY</i> 	MONTMORI LLONITE	France	- absorbing, purifying and astringent properties which are given mainly by its specific layer structures and the large number of minerals and oxides it contains, such as iron, potassium, magnesium, calcium and zinc. -Healing and revitalizing	<u>Packaging</u> : 20 kg <u>DLU</u> : 36 months <u>Granulometry</u> : < 200 µm : > 90% <u>Loss on drying</u> : < 15%

SOME EXAMPLES

Pink Clay Aquitaine PhytPowder in masks for shrinking pores, in soaps for drawing out impurities

Ghassoul PhytPowder in shampoos for absorbing sebum excess, for strengthening hair, in soaps and masks for removing impurities, in body wraps for exfoliating the skin

Palygorskite PhytPowder in matte lipsticks as an opacifying agent, in masks for drawing out impurities
